

# VPX551

## Dual Kintex UltraScale™, 6U VPX

VPX551

## Key Features

- Dual Kintex UltraScale™ XCKU115
- 16 GB of 64-bit wide DDR4 Memory to each FPGA
- Rear fibre I/O via VITA 66.5
- Front fibre via SFP+
- Health Management through dedicated Processor

## Benefits

- Each XCKU115 FPGA provides 5,520 DSP slices for complex processing
- Reference design with VHDL source code speeds application development
- Full system supply from industry leader
- AS9100 and ISO9001 certified company

**vadatech**  
THE POWER OF VISION

# VPX551

The VPX551 provides dual Kintex UltraScale™ XCKU115 FPGAs which interface directly to rear I/O via SERDES, LVDS and fiber. Each FPGA is supported by 16 GB of 64-bit wide DDR4 (2 x Bank of 8GB) and 1 GB flash. Rear panel fiber I/O is via six VITA 66.5 x12 modules, each of which can be populated as transmit or receive. The front panel fiber I/O is via SFP+. The two FPGAs are connected by four SERDES lanes for high speed communication.

The VPX551 includes platform health management/monitoring capability using VadaTech's field-proven IPMI software. An on-board management controller has the ability to access board sensors and manage FPGA image updates.

The unit is available in a range of temperature and shock/vib specifications per ANSI/VITA 47, up to V3 and OS2.

Please contact VadaTech for details of Conduction Cooled versions.

# Reference Design

VadaTech provides an extensive range of Xilinx based FPGA products. The FPGA products are in two categories; FPGA boards with FMC carriers and FPGA products with high speed ADC and DACs. The FPGA products are designed in various architectures such as AMC modules, PCIe cards and Open VPX.

VadaTech provides a reference design implementation for our FPGAs complete with VHDL source code, documentation and configuration binaries. The reference design focuses on the I/O ring of the FPGA to demonstrate low-level operation of the interconnections between the FPGA and other circuits on the board and/or backplane. It is designed to prove out the hardware for early prototyping, engineering/factory diagnostics and customer acceptance of the hardware, but it does not strive to implement a particular end application. The reference VHDL reduces customer time to develop custom applications, as the code can be easily adapted to meet customer's application requirements.

The reference design allows you to test and validate the following functionality (where supported by the hardware):

- Base and Fabric channels
- Clocks
- Data transfers
- Memory
- User defined LEDs

Xilinx provides Vivado Design Suite for developing applications on Xilinx based FPGAs. VadaTech provides reference VHDL developed using the Vivado Design Suite for testing basic hardware functionality. The reference VHDL is provided royalty free to use and modify on VadaTech products, so can be used within applications at no additional cost. However, customers are restricted from redistributing the reference code and from use of this code for any other purpose (e.g. it should not be used on non-VadaTech hardware).

The reference VHDL is shipped in one or more files based on a number of ordering options. Not all ordering options have an impact on the FPGA and a new FPGA image is created for those options that have direct impact on the FPGA. Use the correct reference image to test your hardware. For more information, refer to the FPGA reference design manual for your device which can be accessed from customer support site along with the reference images.

## Supported Software

- Default FPGA image stored in flash memory
- Linux BSP
- Build Scripts
- Device Driver
- Reference application projects for other ordering options

The user may need to develop their own FPGA code or adapt VadaTech reference code to meet their application requirements. The supplied pre-compiled images may make use of hardware evaluation licenses, where necessary, instead of full licenses. This is because VadaTech does not provide licenses for the Vivado tool or Xilinx IP cores, so please contact Xilinx where these are required.

Xilinx also provides System Generator tools for developing Digital Signal Processing (DSP) applications.

See the following links:

[Xilinx Vivado Design Suite](#), [Xilinx System Generator for DSP](#).

# Specifications

Architecture	
<b>Physical</b>	<b>Dimensions</b> 6U, 1" pitch
<b>Type</b>	<b>FPGA</b> Dual Xilinx Kintex UltraScale™ XCKU115
	<b>Memory</b> 16 GB DDR4, 64-bit per FPGA
Standards	
<b>VPX</b>	<b>Type</b> VITA 46.x
<b>VPX</b>	<b>Type</b> VITA 65 Open VPX
<b>Module Management</b>	Open VPX Health Management
Configuration	
<b>Power</b>	~120 W
<b>Front Panel</b>	<b>JTAG</b> Standard JTAG header
	<b>USB</b> USB to FPGA
	<b>1/10GbE</b> SFP+
	<b>LEDs</b> User defined from FPGA Health Management Status
	<b>Switch</b> Reset, push-button
<b>VPX Interfaces</b>	<b>Slot Profiles</b> See ordering options
	<b>Rear IO</b> P0: IPMB for Health Management P1 and P2: Four SERDES x4 from each FPGA P3: Sixteen LVDS from each FPGA P4 to P6: Six VITA 66.5
	<b>Power Supplies</b> On P0: VS1/VS2 = 12 V; VS3 = +5 V
Other	
<b>MTBF</b>	MIL Hand book 217-F@ TBD hrs
<b>Certifications</b>	Designed to meet FCC, CE and UL certifications, where applicable
<b>Standards</b>	VadaTech is certified to both the ISO9001:2000 and AS9100B:2004 standards
<b>Warranty</b>	Two (2) years

## INTEGRATION SERVICES AND APPLICATION-READY PLATFORMS

VadaTech has a full ecosystem of OpenVPX, ATCA and MTCA products including chassis platforms, shelf managers, AMC modules, Switch and Payload Boards, Rear Transition Modules (RTMs), Power Modules, and more. The company also offers integration services as well as pre-configured Application-Ready Platforms. Please contact VadaTech Sales for more information.

# Ordering Options

## VPX551 – ABC-DEF-GHJ

<b>A = P4 VITA 66.5</b>	<b>D = FPGA Speed</b>	<b>G = Applicable Slot Profiles</b>

# Choose VadaTech

## We are technology leaders

- First-to-market silicon
- Constant innovation
- Open systems expertise

## We commit to our customers

- Partnerships power innovation
- Collaborative approach
- Mutual success

## We deliver complexity

- Complete signal chain
- System management
- Configurable solutions

## We manufacture in-house

- Agile production
- Accelerated deployment
- AS9100 accredited
